Surge Protective Devices SPDN-A Series

UL Type 2

Description

Surge protective devices (SPDs) provide equipment protection from transient overvoltage events lasting micro-seconds. By limiting the overvoltage to the equipment during these events, costly damage and downtime can be mitigated.

The NEMA-style SPDN series for external panel mount is available for 120 V to 480 V nominal voltage sub-distribution board applications.

Features & Benefits

FEATURES	BENEFITS		
More direct modes of protection (L-N, L-G, N-G) in a smaller package	Increases protection and design flexibility		
UL 1283 EMI/RFI filtering – 50 dB from 10 kHz to 100 MHz	Helps mitigate effects on power supplies by decreasing zero crossings during ringing transients to prevent interference on performance or unsafe conditions		
Capability to clamp and withstand high-energy transients	Ensures low-residual voltage during high-energy surge events and higher nominal discharge current to prevent disruption, downtime, and degradation or damage to equipment		
Stacked Metal Oxide Varistor (MOV) design	Provides more high-transient voltage protection in a compact, multi- layered structure		
Installs on the load side of the circuit breaker	Simplifies maintenance—without impacting the other parts of the electrical system—by turning breaker off during upkeep		
Thermally protected MOV	Eliminates catastrophic failure		
External LED Indicator	Quickly identifies service requirements to avoid loss of protection		
Compact Footprint	Offers easy retrofit in existing applications where space is limited		

Applications

- Construction
- Food and Beverage
- HVAC/R
- Light Industrial
- Oil and Gas
- Water/Wastewater

Surge Protective Devices SPDN-A Series

Specifications

Maximum Surge Current Rating Up to 130 kA per Phase

I-nominal Rating20 kAUL1449 Short Circuit Current Rating200 kADirect Modes of ProtectionL-N, L-G, N-GUL TypeType 2Phase Loss MonitoringStandardAudible AlarmStandard

Protective Elements Stacked High Energy MOV

Response Time (L-N / N-PE tA) < 25 ns

Mechanical & Environmental

Operating Temperature Range (Ta) $-40 \,^{\circ}\text{C}$ to $+85 \,^{\circ}\text{C}$ (-40 $^{\circ}\text{F}$ to $+185 \,^{\circ}\text{F}$)

Operating Frequency 50–60 Hz

Typical Connection 18" #12 AWG (pre-wired pig tails) 30 A breaker

Permissible Operating Humidity (RH) 0 % to 95 % non-condensing

Altitude (max) 4,000 m (13,123 ft)
Degree of Protection IP20 (built-in)

Housing Material Polycarbonate NEMA 4X – Lid screwed and gasketed

Thermal Protection Yes

Operating State/Fault Indication 1 Green LED (for each phase), 1 Red LED (Fault Indication)

Remote Contact Switching Capacity
Ground Reference Monitoring
Product Dimensions

Ac: 240 V/2 A, 125 V/1 A
N-G Voltage > 20 V Detected
H 2.75"; W 7.95"; D 3.06"

Product Weight 1.38 lb

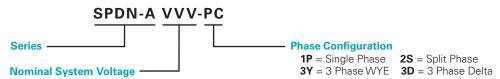

Package Dimensions 4-3/8 x 3-1/2 x 9-1/2"

Package Weight 1.8 lb

Certification & Compliance

cULus	UL 1449, 5th Edition E320116
RoHS	RoHS 2 Directive 2011/65/EU; Directive (EU) 2015/863
REACH	Regulation (EC) No 1907/2006
